

Conditions very similar to type 1 diabetes, eligible for CGM

Children and young people under 21 years with conditions very similar to type 1 diabetes who require insulin.

Category	Condition
A. Genetic defect of beta cell function	Chromosome 20, HNF-4alpha (MODY 1)
	Chromosome 12, HNF-1alpha (MODY 3)
	Chromosome 13, IPF-1 (MODY 4)
	Chromosome 17, HNF-1 beta (MODY 5)
	Chromosome 2, NeuroD1 (MODY 6)
	Chromosome 2, KLF11 (MODY 7)
	Chromosome 9, CEL (MODY 8)
	Chromosome 7, PAX4 (MODY 9)
	Chromosome 11, INS (MODY 10)
	Chromosome 8, BLK (MODY 11)
	Chromosome 11, ABCC8
	Chromosome 11, KCNJ11
	Mitochondrial DNA
	Permanent neonatal diabetes
	Transient neonatal diabetes
Other conditions approved by Department of Health (See *Note below)	
B. Genetic defect in insulin action	Type A insulin resistance
	Leprechaunism
	Rabson-Mendenhall syndrome
	Lipoatrophic diabetes
	Other conditions approved by Department of Health (See *Note below)
C. Diseases of the exocrine pancreas	Pancreatectomy
	Neoplasia
	Cystic fibrosis
	Insulinoma
	Other conditions approved by Department of Health (See *Note below)
D. Endocrinopathies	Glucagonoma
	Other conditions approved by Department of Health (See *Note below)

Category	Condition
E. Drug or chemical induces	Vacor
	Pentamidine
	Glucocorticoids
	Diazoxide
	Alpha-interferon
	NODAT or Post renal transplant
	Post liver transplant
	Calcineurin inhibitors
	Fluoroquinolones
	Highly active antiretroviral therapy (HAART)
	Other conditions approved by Department of Health (See *Note below)
F. Infections	Congenital rubella
	Cytomegalovirus
	Coxsackie
	Other conditions approved by Department of Health (See *Note below)
G. Uncommon forms of immune-mediated diabetes	“Stiff-man” syndrome
	Anti-insulin receptor antibodies
	Other conditions approved by Department of Health (See *Note below)
H. Other genetic syndromes sometimes associated with diabetes	Down syndrome
	Turner syndrome
	Wolfram syndrome
	Friedreich’s ataxia
	Huntington chorea
	Laurence-Moon- Bardet-Biedl syndrome
	Myotonic dystrophy
	Porphyria
	Prader-Willi syndrome
	Glycogen storage disease
	Other conditions approved by Department of Health (See *Note below)

As announced in the 2019-20 Budget, children and young people under 21 years with a diagnosis of Congenital Hyperinsulinaemia (CHI) are also eligible to apply for access to Continuous Glucose Monitoring products through the NDSS. Please contact the NDSS Helpline on 1300 136 588 for more information about submitting an application.

* Note: In exceptional circumstances, consideration may be given on a case-by-case basis to other conditions, noting these will be:

- considered by an appropriately constituted expert panel established by Diabetes Australia that will provide a recommendation to the Department of Health; and
- The Department of Health will be the deciding body for all of these cases.
